NOTICE

February 9, 2011

Water & Sewer bills will be going out this week. As you know, meters are typically read in January and July and bills go out in February and August and are due within 30 days of billing.

While the goal is to have the meters read every 6 months, billing cycles will vary due to the actual date the meter staff reads your meter. As an example, the August bill covered only 5.3 months and it was winter/spring usage (which is typically lower) while the bill you will be receiving this week covers 7.1 months of usage and covers summer/fall months (which typically see higher usage.)

This difference will make your bill fluctuate and you can expect this bill to be higher due to the longer coverage cycle (which usually means higher usage).
