August 5, 2014

Minutes for the Airport Advisory Meeting of July 28, 2014

The meeting was called to order at 6:55 p.m. at the Claremont Municipal Airport by Chief Rick Bergeron. Also in attendance were board members Joe Osgood, Dave Eno, Keith Raymond, Roger Hamel, Steve Keen and Dave Carton.

The minutes of the April 28, 2014 meeting were distributed and reviewed. Those minutes were accepted as written, by the board.

The manager let board member Steve Keen know that his request for permission to cross airport property with underground utilities had been approved.

Chief Bergeron updated the board on the status of the airport's rotary beacon. The new parts have arrived and we are now awaiting the electrician to notify us as to when he will be able to schedule the repair.

It was made known that we hope to have the electrician undertake some GFCI upgrades to the 'T' hangars at the same time that he is on site for the beacon work.

The board discussed possible ways to expand the use of the airport. The discussion ran the gamut from a small on site restaurant to the need for some sort of taxi service or courtesy transport.

The board also discussed possible resources that would help the manager compile a short historical perspective about the airport for a follow up presentation to the council.

Under additional business and comments, Roger Hamel advised that he would need assistance to install the new wind sock and that the automated printer on the AVGAS pump was not working. The manager advised that the airport had a new one in stock and that it would be installed as soon as possible.

The meeting was adjourned at 7:32 p.m.
