January 29, 2013

Minutes from the January 28, 2013 Airport Advisory Board Meeting

The meeting was called to order at 7:00 p.m. at the Claremont Municipal Airport by Chief Rick Bergeron. Also present were board members Dave Carton, Roger Hamel and Joe Osgood.

The minutes from the November 5, 2012 meeting were reviewed by the board members present and accepted as written.

The manager inquired with the board as to knowledge of anyone who might be interested in filling either of the vacancies. The manager was to check to see if there were any rules requiring that the board members be city residents or if a CNH based pilot would be allowed.

The board discussed the final outcome of the state funded crack filling project that was completed in November. Although there were areas of the runway that did not get repaired, it was agreed that the work that was performed was well done.

The manager mentioned that our AVGAS tank is now full and although prices have increased by some forty cents per gallon recently, our price should remain stable through the winter.

The board was advised that the hangar reconstruction study was progressing and that the next meeting involving the planners and the architect should take place in early February.

The manager made the board aware of two additional tree removal projects that extended beyond the end of last year's larger contract. These additional projects were prompted by safety concerns of a couple of the airport abutters who had voiced their concerns to the city manager.

After a brief period of miscellaneous discussion the meeting was adjourned at 7:25 p.m.
