October 30, 2013

Minutes for the Airport Advisory Board Meeting of October 28, 2013

The meeting was called to order at 7:00 p.m. at the Claremont Municipal Airport by Chief Rick Bergeron. Also present were board members Dave Carton, Joe Osgood, Roger Hamel, Steve Keen and Dave Eno.

The minutes from the board meeting of July 29, 2013 were reviewed by the board members present and accepted with one correction. (Dave Carton was mistakenly listed as present)

There was a brief discussion with regards to the current FBO lease agreement which expires at the end of December. This conversation culminated with a proposal for an extension of the current agreement being delivered to the airport manager by Dave Carton.

The manager advised the board that there are plans to have the inside power gate detection loop repaired. The wire loop imbedded in the pavement just inside the gate failed this summer and an effort will be made to re-cut and replace this hardware soon.

The airport manager also explained that the rotary beacon has been out of service for the past few weeks due to a falling tree bringing down the power line that runs through the woods. It will be repaired after some additional trees, which are encroaching upon the power line are cleaned up. There was a NOTAM issued.

The manager spoke about the airport's annual FAA inspection which took place on October 10th. The airport was found to be in very good shape with only a couple of minor tree issues mentioned.

A brief period of questions and comments followed, with the meeting being adjourned at 7:36 p.m.
