Minutes from the April 30, 2012 Airport Advisory Board Meeting

The meeting was called to order at 7:03 p.m. at the Claremont Municipal Airport by Chief Richard Bergeron. Also present were board members Dan Truesdell, Dave Carton, David Eno, Roger Hamel and Philip Osgood.

The minutes from the January 30th meeting were reviewed by members present and accepted as written.

The manager advised the board of the results of the final inspection of the vegetation removal project, noting that approval would not be 100% until the grass in the seeded areas germinated and grew.

Chief Bergeron also advised the board of the two smaller clearing projects along the fence line that were recently completed. As a follow up to these projects, the board was notified that additional cutting efforts would have to be made as affordability would allow.

Roger Hamel advised the board that the snow blower has no use at all this winter and the loader's use was roughly only one third of that of a normal winter.

Those present were reminded that the state still intended to fund a crack filling project for CNH and other New Hampshire Airports later this year, most likely in October.

The board was notified that the City had purchased an LED hilltop beacon in an effort to extend bulb life and reduce cost on electricity and maintenance related labor cost.

The manager told the board that the next project would involve a study that would most likely recommend the replacement of the old wood framed 1927 hangar.

Questions were entertained and the meeting was adjourned at 8:52 p.m.
